iNELS®

HOTEL

In recent years, iNELS has been developed for horizontal control of technologies not only for hotels but also for apartment houses, office buildings and everywhere it is necessary to resolve separate access of current residents, as well as their comfort.

iNELS in the form of GRMS (Guest Room Hotel Management System) enables not only control of lighting, air-conditioning or room access, but also control of music or television. All of this occurs from the central touch panel in designs of clear plastic, the natural materials wood, metal, stone or luxurious glass touch panels. A standard service we offer customers is customization – a description of symbols applied by laser onto plastic or glass controllers based on specification.

Benefits

Adjust to guest

Thanks to integration into a hotel system, it is possible to create a room scene when a guest registers.

GRMS

Guest Room Hotel Management System.

Comfort

The combination of automatic illumination based on motion and central control of the room.

Do Not Disturb

Guests can very easily signal if they want the room cleaned, or do not want to be disturbed.

Master off/Energy saver

When the guest then leaves, the system automatically disconnects all electrical appliances.
