

Our dear Customers...  
**Let's try it wirelessly**

**You and Your Home**

**iNELS RF Control**  
**THE HEART OF YOUR HOUSE**  
 Thanks to iNELS, you're one step at home.  
 Wherever and whenever you want.

**Heating and Cooling**

The warmth of your home. In all rooms exactly like you need.

**Lighting**

Quite simple switching and dimming through the whole house.

**Shutters and Blinds**

Automatic control for the shutters and the blinds according to the intensity of the sun ( according to the intensity of the sunlight ).

**The Wireless Solution From iNELS RF Control**

An absolute unique solution for electrical installation for house or apartment's constructions, or for the electrical installation's expansion.  
 It's nicely and easily done without any demolition or cutting through the walls.

**Appliances**

Easy access for switching the house appliances, such as:  
 Fans, irrigation, pumps, ...

## Safety

Making mistakes is a part of human's nature, that's why your house will be thinking like on a forgetful owner's behalf.

## Quick Control

With one easy touch, you'll be able to control more than one function of scene, for example: lighting scene and pulling the blinds.

## RF smart box

An inconspicuous eLAN-RF-003 box is used for radio frequency remote control actuators (RF), using a web interface, giving you the ability to control them from your smart phone or tablet.

**More on page 10.**

## Let us know.

Would you like to get your **free** individual quotations?

Contact us on our web-page: [www.inels.com](http://www.inels.com).

## Simple Control

Everything is under control and managed with few touches on your smart phone or tablet.

# No worries

Without useless costs

Without time delays

Without any construction work

Saving

Energy saving

Without any construction work

## It saves you

iNELS RF Control Wireless solution saves your time and money, which otherwise you would spend on wiring or demolition. In addition, in the future it saves you energy by reducing the lighting and the heating costs.

## No delay

Everything is quite quick, without any mess or complicated construction work.

## Electrical energy will be under your touch

You can easily control your house appliances, dimming the light, control the blinds, garage doors, the cover of your swimming pool and basically everything you have at your home, which is connected to an electric current.

### Let the technology work

Automate the processes in your house. The time, when your lights could themselves switch on and off, is gone for a long time. Thanks to iNELS all these features can be configured to be suitable for you.

### Spending is under control

iNELS is a good investment. It doesn't only save your money on wasted energy, but it also allows you to choose which modules you exactly need. You don't have to buy the whole system all at once, but instead you can get the parts and the modules you currently need and buy the other modules you'll need later from time to time.

**Wirelessly,** with iNELS RF Control

# Easy and Stylish

## Everything is safe

The communication between the transmitter and the receiver is quite reliable. It doesn't only provide the communication frequency, but also the floating code. Controlling your house by another person, or conflating your system with your neighbor's system won't happen. The transmitting frequency does not endanger your health.

## Whatever you want to control

You can change the system function whenever you want. The variable setting allows a single remote switch in one day, the next day you can switch two lights without any additional investment.

That's how controlling

is with

**INEL**  
RF Control

Your house is literally - under your thumb.  
You can simply control everything in your house,  
using your laptop, tablet or smart phone.

### Clever, even the stylish

Not only smart, but the switches are also designed in LOGUS<sup>90</sup> series. Frames are not only for wired and wireless switches, but also for the classical and data sockets, simple or multiple. Don't only improve your house with a smart system, but also with nice switches.

AL - Aluminium

CA - Crystal/Aluminium

OP - Gold/Pearl

MS - Mahogany/Grey

GA - Granite/Aluminium

### It looks great

Wireless controllers don't need any complicated wiring. They will be wherever you will place them. As many of them you'll own, as many of them will function.

### It's time for a change

For a long time, we were used to have the regular bulbs, and suddenly, new bulbs appeared, which can save our money and our environment. It's a similar thing here with the switches. Till now they have been telling us what to do, but today they conform to us.

# Calculation Sample

## Components Selection

Whether you decided to do a reconstruction or improve your current house, iNELS RF Control will let you choose exactly what you need from these modules. Is it enough for you to control your lighting or your heating regulations as the first step? No problem. When you will want to improve your house again, it would be enough to buy the next modules that you need. The installations are quite simple, as well as controlling them through your tablet or smart phone.

### RF Set

**1. To choose iNELS.** It's a Top Czech product, which has been manufactured by ELKO EP since 2005. Also, thanks to iNELS we kept our title as the best company of the 2012 in Zlín Region.

**2. To decide.** Find out, what do you need at home. The basic set is actually available for everyone. The acquisition costs may well start with 50 EUR. Of course, the more money you invest, the better functions your iNELS has.

**3. To advice.** Please contact us or electrical companies that deal with the implementation of the system. They will be more than happy to provide you with the advise, which is the most suitable alternative usage of iNELS - as well as repayment options.

**4. To enjoy.** Enjoy the sweet comfort that previously you couldn't experience. The whole house is now working to your imagination. It responds to you, it's interactive, it understands you and saves your money. And let you be yourself.

**5. To monitor trends.** iNELS is constantly improving and changing, so follow our news and consider, if they would not fit into your home. The system is modular, so it's up to you what you want to use at home.

# Smart boxes for your electrical installation

System's news

## Smart Box eLAN-RF-Wi-003

This eLAN-RF-Wi-003 smart Box offers a new possibility for controlling RF actuators, which is done by the help of our iHC application ( iNELS Home Control ) for Android. Thanks to the integrated WiFi module, you can connect directly to your RF Control installation, without using any router. This gives you the ability to control your lights, appliances, heating, air conditioning, blinds or irrigation. Simply, you have the entire house under control using your smart phone or tablet, without having to interfere with your original wiring.

## eLAN-IR-003, the smart box for controlling audio-video devices using your smart phone

The Smart Box "The fear of IR drivers" consolidates all your drivers under one. Despite the browser of your smart phone or tablet, you can control your device without them having direct visibility. You can connect and control your phone or tablet, and even when you are not at home. You can switch on air conditioning or heating on the way from work.

The Smart Box can control up to 3 devices, the setting is done by recording commands from your existing controller.

# 10 REASONS

Why should you choose iNELS RF Wireless Control for your reconstruction

1. Do you know that the regulation of heating system can save up to 30% of the energy costs
  2. Without any construction work
  3. The fast duration for electrical installations's implementation
    4. Convenient and affordable prices for everyone
  5. The possibility of upgrading your system - gradually upgrade your installations
    6. Battery - powered transmitters - no electrical injury
    7. The variability of the features that you can change
      8. The Design, which inspires you
    9. Professional assembly and service of our partners
  10. We are the Czech company, which top priority is customer's satisfaction

Our goal is to give you advice how to save ...  
With a smile on the face.
