World leader
in production of relays

ELKO EP

We have been your partner in the field for 30 years, manufacturing and developing the highest quality electrical devices..

ELKO EP employs 330 people across 15 foreign branches that exports its products to more than seventy countries. Company of the Year of the Zlín Region, Visionary of the Year and Global Exporter of the Year are just some of the awards we have received throughout the years as we consistently strive to move forward in the field of innovation and development.

Millions of relays, hundreds of smart homes and thousands of satisfied customers. This is ELKO EP; a traditional company based in the center of Europe, where development, production, logistics, and service are at the forefront of our focus. Building automation systems, smart city facilities and the Internet of Things (IoT) devices are solutions we can offer.

WE ARE

DEVELOPERS
In the new R&D centre, more than 30 engineers develop new products and extend the functionality of existing product.

PRODUCERS
Modern antistatic spaces, 2 x fully automated SMD production lines with 2 shift operations.

SUPPORT
24 hours / 7 days / 360 days we not only provide technical support but also logistics.

SELLERS
Personal access to more than 70 sales representatives in ELKO EP Holding providing impeccable services and superior products at an affordable price.

relay

Timers/Relays

Time relays, auxiliary relays, installation contactors, memory and bistable relays, staircase switches, time switches, twilight and light switches, dimmers and light intensity controllers, power supplies and bell transformers, controlling and signalling devices.

www.elkoep.com/relays

Monitoring/Protection relays

Voltage relays 1-phase and 3-phase (undervoltage, overvoltage, phase failure, phase asymmetry and phase sequence), current relays, level relays, thermostats, light indicator of voltage, power factor and frequency monitoring.

www.elkoep.com/monitoring

iNELS
RF Control

Wireless electro-installation iNELS RF

Components of smart wireless system can be easily and quickly used in existing buildings where it is not desirable to cut holes for cables (e.g. add/change a light switch when changing room layouts). However, it is also possible to assemble a complete system for apartment or house control, intelligent control of heating, blinds or scene settings. When using the eLAN-RF gateway, the entire installation can also be controlled by an application from a mobile phone, tablet or television.

www.elkoep.com/wireless

Hotel Wireless Retrofit (HRESK)

Hotel Room Energy Saving Kit - is a complete solution designed primarily for existing hotel rooms and is based on the iNELS RF wireless system. It focuses on the following areas: "Energy savings": switching off all appliances when leaving the room or not overheating/not overcooling, "Comfort" - all out of bed and "Safety": bell, guest in the room, maid, visitor.

www.elkoep.com/retrofit

iNELS
BUS System

Wired electro-installation iNELS BUS

The sensors and actuators, together with the central unit, which is the heart of the system, communicate via a 2-wires and enable the built up a larger installation for family houses, villas, hotels and buildings. Individual functions of elements are parameterized in iDM SW, so simple and more complex actions can be set.

www.elkoep.com/wired

Hospitality Hotel (GRMS)

Guest Room Management System - is a comprehensive solution designed primarily for new hotels, guesthouses or wellness and is based on the iNELS BUS system. In the room, it resolves the control of lighting, access, temperature control and audio/video distribution. It features glass panels with touch buttons that can be combined in various ways (numbers, shape, and colours) and customized (description, logo).

www.elkoep.com/hospitality

Building management system

Building Management System is the supervisor above the iNELS BUS, resp. wireless system iNELS RF. It enables not only the control of several central units (CU) or gateways (eLAN), but also the connection to other protocols that the technology brings in the building (Modbus, Bacnet, KNX, etc.).

www.elkoep.com/building

Lighting control

iNELS offer a variety of lighting control solutions for all types of light sources: from simple (dimmers from the RELAY range), through wireless (iNELS RF) to sophisticated control within the iNELS BUS installation, which (except conventional R - L - C - LED dimmers) also includes units for light control via DALI and DMX bus.

LOGUS⁹⁰

Switches and sockets

Switches, sockets and a complete range of devices and accessories - this is the Logus90 series from the Portuguese manufacturer Efel. This range is complemented by both standard plastic frames and luxury frames made of purely natural materials: real wood, metal, granite or tempered glass. Be exceptional!

Economy version of CRM-91H. Only the 6 most used functions, 8 A changeover contact, miniUNI power supply AC / DC 24-240 V + DC 24 V.

The most used multifunction time relay for universal use in automation, control and regulation or in house installations. 10 functions, 10 time ranges, multifunctional LED signalling, universal power supply in a wide range of AC / DC 12-240 V.

As a CRM-91H, but with the possibility of time control by an external potentiometer. The potentiometer is mounted in a panel, hole diameter 25 mm.

Relay for automatic switching of electricity using connected sensors (motion detector and magnetic door contact) in the room.

TIME RELAYS | multifunction, on DIN rail

multifunction with Inhibit (delay) 1x output contact | multifunction 3x output contacts 2nd & 3rd contact selection | multifunction galvanically separated control input | multifunction 3 control inputs | OFF DELAY after power supply failure

Order code	7554	8063	7555	7556	7580

All functions initiated by the supply voltage, except for the flasher function, can use the control input to inhibit the delay (pause).

All functions initiated by the supply voltage, except for the flasher function, can use the control input to inhibit the delay (pause). 2nd & 3rd contact mode selection.

Galvanically separated control input (Power Trigger) for control with external voltage in the range at AC / DC 12-240 V.

Three control inputs – START, INHIBIT, RESET. All functions start with triggering of control input START.

Relay is timing after power supply failure and is switched off after set time period. Two time functions: a - TRUE OFF DELAY e - ON DELAY

TIME RELAYS | single function, on DIN rail

Order code	7453	UNI: 304 230V: 303	UNI: 306 230V: 305	7077	7491

Control input B1 is controlled by the supply voltage. More accurate thanks to digital time setting.

Multifunction programmable digital relay with 4-digit red LED display. It is used for applications where it is necessary to set the exact time (have a visual check).
PDR-2A: optional second relay function (16 functions)
PDR-2B: individual setting of the functions for both output contacts (10 functions).

It is used for delayed switching off of lighting on stairs, corridor, entrance ... It is controlled by the button or several buttons from several places (connected in parallel). 3 or 4 wire connection.

Smart features:
- extending time
- premature shutdown
- impulse relay
- signalling before switching OFF.
3 or 4 wire connection.

TIME RELAYS | flush/cover mounted

multifunction 3-wire (without NEUTRAL) on input: LED bulb

BOX flush mounted

Multifunction time relay for installation in an installation box for 3-wire connection (does not require NEUTRAL). An LED bulb or energy saver can be connected in parallel to the control input.

Like the SMR-K, but in parallel to the control input, unlike the SMR-K, neither an LED bulb nor an energy saver can be connected, only other types of loads. Glow-lamps are supported.

Multifunction time relay for installation in an installation box for 4-wire connection (requires Neutral). Not suitable for switching LED bulbs.

Multifunction time relay for installation in an installation box for 4-wire connection (requires Neutral). Thanks to the switching contact AgSnO₂, it is also suitable for switching LED bulbs or savings.

GPS receiver for SHT-6G GPSR-1

It is used to control various appliances depending on the real time: with weekly (SHT-1), and weekly and annually (SHT-3) program. Power backup in case of battery power failure. Backlit LCD display, sealable cover. Possibility of automatic summer / winter time transition. Additional functions: manual control, random switching, and pulse output.

Switches the output according to the time of sunrise and sunset based on geographical coordinates or European cities.

Settings via smartphone with NFC communication (Android).

ANALOG TIME SWITCHES |

with daily program and power backup

with daily program

Max. load capacity	20 A	20 A	25 A	40 A	63 A	20 A	20 A	25 A
Number of poles	1	2	4	4		4	2	4
Contact configuration (NO/NC)	10, 01	20, 11, 02	40, 31, 22, 04	40, 31, 22, 04	40, 31, 22	40, 31	20, 11, 02	40, 31, 22, 04
Coil supply voltage (frequency)	AC/DC 24 V, 230 V (AC 50-60 Hz)	AC/DC 24 V, 48 V, 110 V, 230 V (AC 50-60 Hz)	AC/DC 24 V, 48 V, 110 V, 230 V (AC 50-60 Hz)	AC/DC 24 V, 110 V, 230 V (AC 50-60 Hz)	AC/DC 24 V, 48 V, 110 V, 230 V (AC 50-60 Hz)	AC 12 V, 24 V, 48 V, 110 V, 230 V (50-60 Hz)	AC 12 V, 24 V, 110 V, 230 V (50-60 Hz)	AC 12 V, 24 V, 42 V, 230 V (50-60 Hz)
Dimensions	17.5 x 85 x 60 mm		35 x 85 x 60 mm	53.3 x 84 x 60 mm		35 x 62.5 x 57 mm	17.5 x 85 x 60 mm	35 x 85 x 60 mm

These contactors are characterized by soft-switching operation, with DC coil and rectifier, what ensures a quiet operation and running. Used to switch electrical circuits, in particular resistive loads and three-phase asynchronous motors. IP20 protection - guards providing IP40 protection of all contactor (VS420 excluded) terminals are available upon request. It is possible to connect auxiliary contact VSK-11 and VSK-20 to the contactors VS220, 425, 440, 463. Installation on DIN rail or on panel.

Like VS, but moreover slide switch allowing manual control 1-AUTO-OFF.

Coil disconnecter	x	x	x	yes	yes	x	x
Order code	6969	6885	6970	6887	6971	6886	6972

The state of the output contacts changes with the coil pulse. They are used mainly for switching and control of luminaires, heating, ventilation and other devices - with buttons connected in parallel. All relays can be controlled manually using the lever on the front panel (I-O), which also serves as a status signal. In addition, the BR-220 and BR-232 have a switch for disconnecting the coil, as a result of which it can then only be operated with a slide switch on the front panel. In steady state (ON or OFF) it has zero consumption.

Similar to the Bistable BR relay, but thanks to the electronic design, the switching is almost noiseless. The relays remember their state even after the power failure is restored (the output is always OFF in the event of a power failure, after the power supply is restored it automatically returns to the state before the power failure).

MR-42: 2nd output option:
a) Parallel contact b) step relay

TWILIGHT SWITCHES |

analog with external sensor digital with build-in time switch and external sensor for outdoor use with built-in sensor external photosensor

Technical parameters	SOU-1	SOU-2	SOU-3	SKS-100, SKS-200

Order code	8046	7551	8234	4056

Twilight switch (1-100 lx) or (100-50 000 lx), which closes the output when the level falls below the set level. External sensor SKS-100 included in the package.

Digital twilight switch with timer, i.e. the lighting level can be blocked in real time. External sensor SKS-200 included in the package.

Twilight switch (1-1000 lx), which closes the output when falling below the set level or light switch (100-100.000 lx), which closes the output when the level is exceeded.

New external photosensor SKS-100 and SKS-200 for panel or wall mounting, via the included bracket.

		The type of light source is set with a switch on the front panel. Setting the minimum brightness with the potentiometer on the front panel eliminates the flickering of some types of energy-saving light bulbs (ESL) and LED.	The gradual increase of brightness, deceleration and duration of illumination can be set by potentiometers on the panel: • rise and falling length: 1 - 40 s • light duration: 0 - 20 min • brightness: 10 - 100%	The dimmer can be controlled in several ways: with buttons, an external potentiometer, and an analog signal 0(1)-10 V or with the iNELS BUS system. Power expandable up to 10kVA DIM6-3M-P modules.

universal dimmer 4-wires (with NEUTRAL)

dimmer 3-wires (without NEUTRAL)

lighting intensity controller, controls the source directly

lighting intensity controller, controls the 0-10 V ballast

universal dimmer 6-channels 6x 150 VA (230 V)

Order code	4377	2351	4493	4531	230V: 8205	120V: 8209
		The type of light source is set with a switch on the instrument panel.	3-wire connection (without NEUTRAL), but minimum load 10 W.	It automatically maintains the intensity of artificial lighting in the room according to an external outdoor light sensor SKS-100.	As LIC-1, but at the output a continuous analog signal 0 (1)-10 V for controlling electric ballasts.	Universal 6-channel dimmer with an output of 900 VA. The outputs can be connected in parallel and multiply the power at the expense of the number of outputs. Control with wired buttons or wireless iNELS RF.

USS-ZM
Basic module

USS

Designated for switching, control and signaling of auxiliary and power circuits. USS - "Do-it-yourself" = various types of switching and signaling units can be "snapped" in the basic module. Units are supplied separately, individual configurations are assembled by the user. It is possible to place up to two units into 1-MODULE (for example 2x switch, 2x signalling lights or combinations) = when compared with competitors it is saving place in a switch board. Operating temperature -20 to +55°C.

Example of combinations

USS-01 + USS-03 USS-07 + USS-11 USS-11 + USS-01

USS-13 + USS-10 USS-12 + USS-11 USS-07 + USS-00

Allows you to manually or automatically control heating or air conditioning in relation to the daily or weekly program and the set temperature.

Controls heating or air-conditioning systems depending on the selected temperature. It is possible to connect a floor temperature sensor to automatically detect and connect to it.

Hygro-thermostat for temperature monitoring and control - range 0 to +60 °C and relative humidity - range 50.90 %. Sensor is part of device - designated for measuring in switchboard.

A basic hygrostat to monitor and control the relative humidity 0-90 %. Outdoor version IP65, box for wall mounting, removable lid without screws.

energy saving digital radiator thermo-valve

Power supply	AC 3x400/230 V (50-60 Hz)	AC/DC 24 V, AC 230 V, AC 400 V (AC 50-60 Hz)	AC 161-500 V (50/60/400 Hz)
Dimensions	90 x 17.6 x 64 mm (3.5" x 0.7" x 2.5")	90 x 52 x 65 mm (3.5" x 2" x 2.6")	

MPS-1: 4597

Used for optical signaling of the voltage level in 3-phases. 4-wire connection - L1, L2, L3, N. Monitors phase voltages against neutral wire. LED indicator - for every phase 1 LED.

COS-2/24V: 5544

COS-2/230V: 5543
COS-2/400V: 5236

Relay monitors phase off-set between current and voltage in 3-phase or also 1-phase networks - it evaluates cos-φ. The relay is predestined for motor overloading / relief monitoring.

HRF-10: 5011

The relay is designed for monitoring the frequency of AC voltage, eg in photovoltaic power plants and generators.

Used to control devices with analog control voltage 0(1)-10V. Included is a relay contact to turn off the ballast light.

The light source is selected by a switch on the front panel, potentiometer for minimum brightness, input for wired button.

It should dim up to 32 DALI drivers powered from DALI BUS. Configuration via bluetooth from the app.

As version "RFDEL-71B", but DIN rail designed inputs for external control by potentiometer or analog voltage 0 (1) - 10 V.

The dimmer for LED strips is used for independent control of 3 single-colour LED strips or one RGB LED strip.

Universal six-channels dimmer with an output of 150 VA / 75 VA channel. The outputs can be connected in parallel and multiply the power at the expense of the number of outputs (up to 900 VA / 230 V) when connecting all 6 outputs together.

Dimming socket-plug

Switching socket-plug

Switching unit for outdoor use

Technical parameters	RFDSC-71N	RFSC-61N	RFUS-61
Type of load	R - L - C - LED - ESL max. 300 W/150 W	1x NO, 16 A/AC	1x CO, 12 A/AC1
Supply voltage (frequency)	AC 230 V (50-60 Hz)	AC 230-250 V (50-60 Hz)	AC 230 V (50-60 Hz)
Design	socket-plug	socket-plug	IP65
Dimensions	63 x 110 x 74 mm	63 x 110 x 74 mm	136 x 62 x 34 mm
Protocol	RFIO2	RFIO2	RFIO2

RFUS-61/120V: 5256
RFUS-61/230V: 5853
Switching component with 1 output channel in a box with increased coverage for outdoor environments.

Liquid probe

External probe designed for Level sensor RFSF-1B for flood monitoring. 1 m cable can be extended by 30 m.

Conductivity probes (recommended FP-1) can be connected to the INPUT terminals to monitor flooding or the level in the tank. When activated, it sends a command to the actuator or eLAN.

The flood detector is used to detect water leaks - activation occurs when the contacts located on the bottom of the detector are flooded.

2 functions in 1 unit:
Twilight switch for range 1-1.000 lx or
Light switch for the range 100-100,000 lx
Setting the values of the potentiometers inside. Enclosure with increased IP65 protection for demanding environments.

Main device (wider part) and Magnet (narrower part) glued to the moving parts (door, window, gate...)
Activation occurs when the detector is moved away from the magnet.

The motion detector PIR is used to detect persons moving inside the building interior.
Detection angle 105°
Detection distance max: 12 m
Working height: 2.4 m
Integrated light sensor and tamper against unwanted opening of the cover.

2 contacts converter - permanent switching

4 contacts converter battery powered

4 contacts converter AC 230 V powered

1 contact converter - permanent switching

Pulse converter

Technical parameters	RFIM-20B	RFIM-40B/BP-SL	RFIM-40B/230V-SL	RFSG-1M	RFTM-1
Battery power	1x 3 V battery CR2477	batterie CR2032	AC 230V (50-60 Hz)	AC 10-230 V (50-60 Hz)	2x 1.5 batteries AAA
Design	BOX	BOX-SL	BOX-SL	1-MODULE	BOX
Dimensions	49 x 49 x 13 mm	43 x 44 x 22 mm	43 x 44 x 22 mm	90 x 17.6 x 64 mm	72 x 62 x 34 mm
Protocol	RFIO	RFIO2	RFIO2	RFIO2	RFIO
Order code	8281	8406	8407	8240	4315

Converts 2 potential-free inputs that can be permanently closed (switch, relay contact) to RF signal.

Converts 4 potential-free inputs that can be closed for a short time (buttons) or permanently (switch, contact) on the RF signal.

RFIM-40B / BP-SL: battery supply (CR 123A)
RFIM-40B / 230V-SL: mains supply (AC 230V)

This wireless contact converter is especially appropriate for wireless transmission of information on switching HDO. Thanks to the network supply, it can also be used for partial transmission of information for control of an appliance or device. Bidirectional communication RFIO2.

Allows conversion of pulses produced by energy meters. Via LS sensors (detects flashing LEDs on the meter) or MS (magnetic sensor for water meter handle or gas meter dial). It has a terminal for connecting the pulse output (open contact, 50 terminals of the electricity meter).

Simple temperature controller

Autonomous temperature controller

Thermostat for fancoil control via RFSAs-166M

Covers:

AL - aluminium

GE - ice

IS - gray

MF - ivory

PE - pearl

Technical parameters	RFTC-10/G	RFTC-50/G	RFTC-150/G
Battery power	2 x 1.5 V battery AAA		
Design	LOGUS ⁹⁰		
Dimensions	85 x 85 x 16 mm / 94 x 94 x 16 mm		
Protocol	RFIO		
Order code	RFTC-10/G/BR	RFTC-50/G/BR	RFTC-150/G/BR

RFTC-10/G: design BASE, white cover, white frame, **order code:** RFTC-10/G/BR - used for temperature measurement (in the range of 0 to 55 °C) and correction of the pre-set temperature in RF Touch or eLAN-RF system devices in the range of ± 5 °C.

RFTC-50/G: design BASE, white cover, white frame, **order code:** RFTC-50/G/BR - is a separate thermostat that allows wireless control of up to 4 switching elements, eg. RFSAs-6x / RFUS-61 / RFSTI-11B.

RFTC-150/G: design BASE, white cover, white frame, **order code:** RFTC-150/G/BR - thermostat for controlling the RFSAs-166M switching component for fan coil control. Thermostat **covers** are available in: Pearl (PE), Ivory (MF), Gray (IS), Ice (GE) and Aluminium MF(AL) colour. It is thus possible to combine them with all LOGUS⁹⁰ frames.

Order code	8404	3175	4915 3409	8259

Switching component (16 A relay contact) with input for external temperature thermostats TC / TZ.

The internal or external TC / TZ sensor measures the temperature in the range -20 to + 50 °C and sends it to the system device (eLAN-RF or RF-Touch) at regular intervals (5 min).

Most suitable for hotel rooms. The components support communication with RF detectors. Range 160 m.

The wireless thermal head measures the room temperature with an internal sensor, and opens / closes the radiator valve based on the set program in the system component.

Temperature sensors TC/TZ more on page 23

* allow to control the units independently

It includes simple automation functions, such as temperature and time programs, control of RGB strips and light bulbs, quick control and more.

Like RF Touch-B with new display (diagonal 4", 480x480 px, multi touch). Communication: iNELS radio, wi-fi and LAN. Including eLAN-RF for direct or indirect (iNELS Cloud) control from iNELS app.

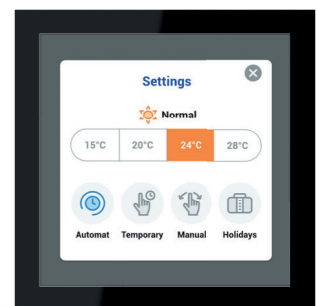

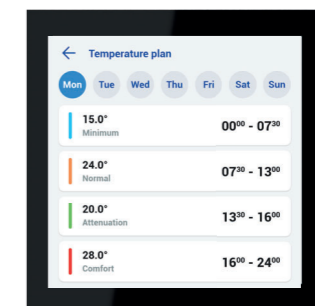

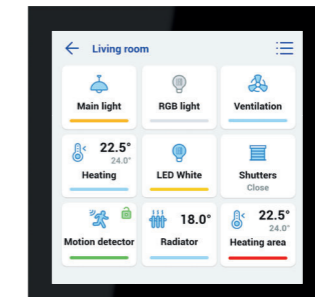

The RF Smart box is a gateway between iNELS RF components and applications: smartphone, tablet, watch, television, voice assistants (Google Home & Alexa) and other third party devices. Allows remote control: direct or via Cloud. It is available in two versions: a) eLAN-RF-103: LAN communication b) eLAN-RF-Wi-103: LAN communication and WiFi in AP mode or in Client mode.

The signal repeater is used to increase the range between the controller and the component by up to 200 meters. It is designed for signal transmission to up to 20 components.

WIRED ELECTRO-INSTALLATIONS
iNELS BUS

CENTRAL UNITS |

Basic central control unit
iNELS BUS

CU3-07M

Order Code: 8010

- Cu3-07M is one of the basic system control units of iNELS BUS installations.
- The unit can work independently, as an autonomous project, or it can be controlled by the CU3-IPMASTER central unit as part of a larger project.
- The unit is equipped with one BUS to which it is possible to connect up to 32 elements from the iNELS BUS portfolio.

Extended central control unit
iNELS BUS

CU3-08M

Order Code: 8440

- CU3-08M is one of the basic system control units of iNELS BUS installations.
- The unit can work independently, as an autonomous project, or it can be controlled by the CU3-IPMASTER central unit as part of a larger project.
- The unit is equipped with two BUS, to which it is possible to connect a total of up to 64 elements (2x32) from the iNELS BUS portfolio.

Central unit for control of
DALI ballasts

CU3-09M/DALI

Order Code: 8465

- CU3-09M/DALI is a special version of the minified central unit and is designed to control DALI electronic ballasts from the iNELS system.
- The unit can work independently, as an autonomous project, or it can be controlled by the CU3-IPMASTER central unit as part of a larger project.
- The system unit is equipped with one BUS, one DALI bus and one RJ45 connector.
- Up to 32 elements from the iNELS BUS portfolio can be connected to the BUS system.
- The DALI system bus allows the control of up to 64 independent DALI ballast addresses for fluorescent, LED and other luminaires.

Superior central control unit
projects using
iNELS IP protocol

CU3-IPMASTER

Order Code: 8448

- The CU3-IPMASTER central unit is a high-performance control unit designed for controlling subordinate units compatible with the iNELS IP protocol.
- CU3-IPMASTER is designed for fully autonomous control of even very large projects consisting of 1000+ subordinate central or system units. Using the iNELS IP protocol, the unit communicates with the centralized iNELS Cloud environment, which can be used to connect multiple large projects into a centrally controlled project.
- The iNELS IP protocol also allows the use of the iNELS mobile application to control all devices included in the project.
- Communication and links between individual system elements are set up in the iNELS Designer Manager configuration software environment, which is designed for Window 7, 8 and 10 systems.

2-channel actuator for dimming ESL, LED and RLC loads, 2x 400 VA, 2x input for wired button, 1x input for temperature sensor TC/TZ.

Output power 150 VA / channel. The outputs can be connected in parallel and multiply the power at the expense of the number of outputs (up to 900 VA when all 6 inputs for wired buttons).

Analog 2-channel actuator for dimming electronic ballasts. This unit has 2x analog output 0(1)-10 V, 2x changeover contacts 16 A, LED signalization of relay status.

LIGHTING CONTROL |

Gateway
iNELS-DALI/DMX

Combined
detector

Luminescence
sensor

Technical parameters	EMDC-64M	DMD3-1	DLS3-1
iNELS BUS/EBM	EBM	BUS	BUS

Dimensions	90 x 52 x 65 mm	Ø 76 x 73 mm	96 x 62 x 34 mm
Order code	5030	5751	5750

The converter supplies the DALI BUS - 16 V, 250 mA. The EMDC-64M unit is designed to control electronic DALI ballasts and DMX receivers from the iNELS system. It allows controlling of up to 64 independent electronic DALI ballasts or 64 independent DMX receivers.

The motion detector is used to detect movement in the area using the passive infrared scanning spectrum for detection. Integrated luminescence sensor can be used for sensing current luminescence at the point of installation of the unit. This unit can be installed also on DALI BUS.

DLS3-1 is for sensing the current luminescence in the place of installation of the unit. The DLS3-1 is supplied in IP65 protection box and can be installed outdoors. The unit supports DALI BUS.

Housing	3-MODULE	3-MODULE
Dimensions	90 x 52 x 65 mm	90 x 52 x 65 mm
Order code	3301	3256

Analog signal converter is iNELS3 device which converts analog to digital signal (e.g. for weather station connection), 6x analog input, 2x temperature input for TC or TZ sensor.

Converter from a digital signal to an analog voltage signal 0(1)-10 V, for controlling electronic ballasts, thermo drives, etc., 4-channel, 1x temperature input for TC/TZ sensor.

COMBINED UNITS |

Technical parameters	RC3-610M/DALI	RC3-612M	IOU3-108M	FA3-612M
Output	8x NO contacts (10 A), 2x analog (0-10 V), 32/64 DALI address	8x NO contacts (10 A), 2x analog (0-10 V), 2x PHASE dimmers (150 VA)	8x switching, 10 A	4x (0)-10V, 4x switching, 4x SSR

Order code	8466	8467	8188	3257

The unit is designed to control hotel rooms. The unit is equipped with 6 binary inputs, of which 2 can be configured as temperature inputs and 8 independent relays with switch contacts. It also includes two analog outputs and a bus for controlling up to 64 DALI ballasts.

The unit is designed to control hotel rooms. The unit is equipped with 6 binary inputs, of which 2 can be configured as temperature inputs and 8 independent relays with switch contacts. It also includes two analog outputs and two-phase dimmer channels.

Actuator can switch the appliances, light circuits, thermodrives, etc., possibility of connecting wired buttons and temperature sensors. Outputs supports zero-crossing mode.

Actuator is designed to control fan coil units using analog/digital inputs and analog/relay outputs. The unit has 3 analog inputs and 3 galvanically separated digital inputs.

WALL UNITS AND CONTROLLERS |

Technical parameters	EST3	GSB3-40	GSB3-60	GSB3-80

Dimensions	94 x 94 x 36 mm	94 x 94 x 36 mm	142 x 94 x 36 mm
Order code	11/B: 5747 11/W: 5748	10/B: 5726 10/W: 5727	100/B: 5628 100/W: 5632

Glass card reader GCR3-11 is designed for reading smart cards, which are intended to enter the hotel room or any other part of the building. The GCR3-11 unit is a design component of the INELU3 system and is available in elegant black (GCR3-11/B) and white (GCR3-11/W) variants.

Glass info panel GDB3-10 is part of a comprehensive series of glass INELU3 control units for guest room management system (GRMS), and is used to indicate the requested status of guest room - "Do Not Disturb" and "Make Up Room". It is available in elegant black (GCR3-11/B) and white (GCR3-11/W) variants.

The GSP3-100 is equipped with ten touch buttons whose functions can be easily adjusted. Button symbols can be changed and adapted to the client's requirements upon a request. The buttons can be backlit in red, green, blue, yellow, pink, turquoise and white. The panel is available in elegant black (GSP3-100/B) and white variants (GSP3-100/W).

Technical parameters	GSB3-20/S		GSB3-40/S		GSB3-60/S	
Number of buttons	2		4		6	
Supply voltage	BUS 27 V DC		BUS 27 V DC		BUS 27 V DC

Order code	20/SB: 5621	20/SW: 5622	40/SB: 5623	40/SW: 5624	60/SB: 3291	60/SW: 3298

The glass switch with touch buttons in series GSB3 is a design element (controller) in the system iNELS3 with elegant and comfortable control options. Controllers are available in black (e.g. GSB3-40/B, 60/B and 80/B) and white (e.g. GSB3-40/W, 60/B and 80/B) variants.

The glass switch with touch buttons with symbols in GSB3 series are equipped with two, four or six touch buttons, the functions of buttons can be easily adjusted. Button symbols can be changed and adapted to the client's requirements upon a request. The buttons can be backlit in red, green, blue, yellow, pink, turquoise and white. Touch panels are a design components of the iNELS3 system and are available in elegant black (GSB3-20/SB, GSB3-40/SB, GSB3-60/SB) and white variants (GSB3-20/SW, GSB3-40/SW, GSB3-60/SW).

Glass bedside panel - right and left

Technical parameters	GBP3-60R	GBP3-60L
Number of buttons	6	
Supply voltage	BUS 27 V DC	
Rated current from BUS	25-50 mA (at 27 V DC)	
Measurement	1x external input for TC/TZ or 1x digital, brightness sensor	

Order code: 5728

Order code: 3533

GBP3-60 is available in several designs and is very flexible and efficient solution for a wide range of projects. The following variants are available:

- Left / right design providing the same comfort of control from both sides of the bed.
- Accessories like power sockets, network sockets, HDMI or USB can be easily added in the bedside panel by changing the VIMAR modules.
- Black / white elegant design suitable for almost any interior.

GBP3-60 can be equipped with a number of modules, eg:
 - AC power sockets: UNI, Schuko, French, British.
 - other types of modules: 2xUSB, USB, LAN, HDMI

Configure bedside panel according to your request.

L (left option)

GBP3-60/WL/2F-26W-20W

GBP3-60/WL/1F-21W45W

R (right)

GBP3-60/BR/2F-26B-11B44B

GBP3-60/BR/1F-26B

Part number

* In case of 1-MODULE choice it is necessary to pick 2x 1-module to fill up the 1 position, for example GBP3-60/WL-21W45W.

Hotel control unit with touch screen

Glass room thermo-regulator

Glass card holder

Technical parameters	EHT3	GRT3-50	GCH3-31	
Input	-	-	1x changeover, 8 A	
Number of buttons	touch screen	7	3	
Supply voltage	BUS 27 V DC	BUS 27 V DC	BUS 27 V DC	
Rated current from BUS	150 mA (at 27 V DC)	85 mA (at 27 V DC)	100-120 mA (at 27 V DC)	
Measurement	-	internal thermometer and humidity sensor, 1x external input for TC/TZ or 1x digital	brightness sensor	
Dimensions	94 x 94 x 36 mm	94 x 94 x 36 mm	142 x 94 x 36 mm	
Order code	available in the price list	50/B: 5630 50/W: 5634	31/B: 5627	31/W: 3494

The control unit with touch screen EHT3 is a suitable control element for iNELS3 in places where it is required to control multiple devices. The unit replaces multiple controllers and reduces the number of switches on the wall. In LOGUS⁹⁰ design.

Glass room thermo-regulator GRT3-50 is part of a comprehensive range of glass iNELS3 control units for guest room management system (GRMS) and serves to regulate the temperature in the room. Thermo-regulator is also equipped with 3 symbols for controlling fancoil speed.

GCH3-31 serves for inserting the RFID card into the holder, whereby the system acquires the information about whether the hotel guest is present in the room. With this information it is possible to ensure for example exit function with relation to energy savings in the absence of a guest in the room.

eLAN-IR-003

gateway for connecting protocols
and devices by a third party

Home Assistant GW

Order code: 3283

- The applications iHC-MAIR and iHC-MIIR provide universal control for all audio/video devices (including air conditioning).
- The application directly control the eLAN-IR over the network.
- The intuitive application environment makes it simple for anyone to control.
- What all can you control? Home theater, TV, DVD or Blue-ray player, amplifier, set-top box, satellite receiver, air-conditioning, projector and more.
- It can control up to 100 arbitrary commands with various controllers that you normally have at home.
- The scenes function - you can perform multiple functions simultaneously by a single command (e.g. you are going to bed you and switch off all AV appliances in the entire home with a single press).
- It is possible to integrate into a single application an unlimited number of IR boxes, meaning that in one application you can have eLAN-IR in the living room, children's rooms, etc.
- It is also possible to control remotely from anywhere using a Wi-Fi network (e.g. from work or vacation).
- Thanks to auto-IP acquisition from the DHCP server, you don't need to set up a network configuration again.
- You can connect three IR lenses to the smart IR box eLAN-IR-003 for three directions of controlling.

Order Code: 8464

- Third party integration server.
- Works as a server for connecting third-party devices and integrating them into the iNELS environment.
 - The server uses the open Home Assistant platform, which contains more than 1000 existing integrations. The platform is supported by its own community and the number of integrations is constantly growing. Thanks to the Open Source architecture, it is possible to create your own integration driver for new devices if necessary.
 - The Home Assistant GW communicates via the iNELS IP protocol, so it can be controlled via the iNELS mobile application or the CU3-IPMASTER master.
 - The Home Assistant GW uses Raspberry Pi hardware. The package also includes an SD card with a pre-installed Linux operating system and the necessary software.

converter IP
=>RS-485/232

eLAN-RS-485/232

converter IP
=>RS-485/232

Connection Server

Order code: 7026

- The eLAN-RS485/232 allows you to control air-condition from your smart phone, tablet, or it can read a data from electronic security systems (Jablotron, Paradox).
- The eLAN-RS485/232 is connected to the router or switch and communicates with a smartphone over the network.
- Intuitive application environment offers centralized control from one place.
- If you don't have a fixed IP address, the converter will automatically get it from the DHCP server.
- Power converter with 10-27 V DC adapter is included
- Possibility of PoE 24 V DC.
- You need a Connection Server (to communicate with the application) to install.
- Set up via web interface.

Order code: 5803

- The connection server is providing a communication between iNELS BUS System with the third party devices, smartphone or tablet.
- The iHC application's environment enables us to control all these technologies from just one app.
- If Connection server is present in the installation, you can control your household with the smartphone app, check your CCTV system, regulate the air-conditioning, control Miele appliances or control recuperation.
- It also allows the communication with the domestic voice intercom 2N. It can also arrange the information from the weather station GIOM or data from energy meters (electricity, water, gas), which is visualized in clear graphs.
- Connection server uses the Raspberry Pi hardware and the apps requires a license which is paired with the MAC address of the device.
- As a part of the package, we also included SD card where we previously installed Linux OS and its needed software equipment.
- The configuration is happening on its own web interface, where the default IP address is not fixed. (The IP address is assigned from the DHCP server and it's needed to be known when we're connected to the network).

Music and internet radio player

Music and internet radio player with intercom
and videophone features

Technical parameters	LARA Radio	LARA Intercom
Power supply	Passive PoE 24 V DC/1.25 A	Passive PoE 24 V DC/1.25 A
Min. /max. input	1.4 W / 26 W (peak at maximum playback performance)	1.4 W / 26 W (peak at maximum playback performance)
Display	Color OLED, Resolution: 128 x 128 pixels	Color OLED, Resolution: 128 x 128 pixels
Microphone	no	yes

Order code: LARA-R

- Music and internet radio player - all in the dimension of a switch and a luxurious LOGUS⁹⁰ design.
- LARA Radio - when connected to the Internet, it can play streaming radio stations and you can store up to 40 of them. But you can also select from thousands of radio stations from across the globe, which provide data for correct connection.
- LARA Radio can play content from an external music source, which can be a smart phone or e.g. an MP3 player. These devices are connected to a 3.5mm stereo jack audio input, located underneath the front panel.
- LARA Radio can also play audio files from central data storage.

Order code: LARA-IC

- LARA Intercom offers users 5 different functions and expands even more options to LARA Radio - music players and internet radio stations within the range of LOGUS⁹⁰ switch designs.
- LARA Intercom provides an extra functionality and videophone intercom.
- Thanks to videophone function, now it is possible to have a voice communication between LARA and IP intercoms. So if someone ring the doorbell, you can see the picture of the visitor on the screen. Controlling of electronic door lock from LARA is the easiest thing.
- LARA Intercom is equipped with an OLED colored display with the size of 1.5", which is used to transfer images and sounds from the door camera properly.

Wiring example

The application allows you to easily control connected devices such as switch sockets, dimming lights, controlling blinds or garage doors, heating circuits and compatible air conditioning. Of course there is a display of the available values such as temperature, motion status, window, door or flood detectors, or the current status of all controlled devices. It now brings a clear Dashboard where it is possible to view the most used devices, previews of connected cameras or created scenes. With one click, you can control several devices at once.

The iNELS application will be gradually supplemented automatically with the possibility to connect new devices, new system and central units and third-party devices. With the new iNELS mobile application, enter a completely new world in the expansion of functions and integration possibilities with the iNELS 2022 system.

Overview

Dashboard of the state of all devices.

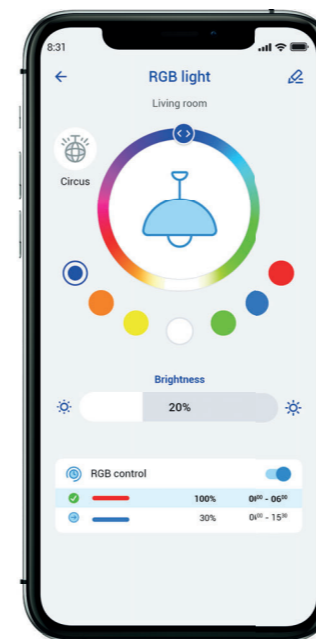

Device list

Control the device from anywhere.

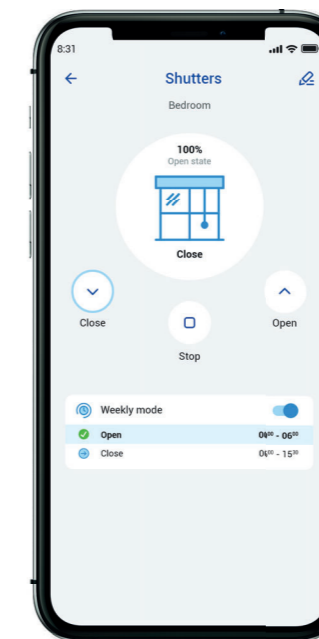

Rooms management

Settings according to individual rooms.

Colour setting

Easy adjustment of the light scene with one touch - switching, dimming, colour.

Shutters/Blinds

Possibility of individual or joint control of shading technology.

Temperature

You can set the temperature in each room exactly as you like.

LOGUS⁹⁰

Luxurious design for any interior

LOGUS⁹⁰

DESIGN LINES

We offer you switches, sockets and accessories in standard design, plastic or metallic, but you are also sure to be enchanted by the luxurious designs of frames made from natural materials: solid wood, metal, granite or hardened glass - crystal.

You will see quality not only in the visible parts of the covers, but also in the switch mechanism itself. The mechanisms excel for their many features that make installation quick and easy, and guarantee safe operation. Thanks to their special design, they can even deal with potential wall unevenness.

The frame is complemented by a button cover in the shades of pearl, aluminum or e.g. dark gray or ice - where many combinations come alive based on the customer's wishes and personal taste. Not just their refined design, but also long service life and resilience are the hallmarks of these switches.

BASE
Smart finish. Discrete shape of function.

AQUARELLA
Distinct colors. Shades that characterize the space.

ANIMATO
Large selection of colors, modern design and pleasant price.

CRYSTAL
Brightness and clarity. Shades that bring the shine of crystals into a honed experience.

METALLO
Distinction and modern feel. The refinement and brightness of metal enhance the value of the surroundings, and lend inspiration to great moments.

ARBORE
Selection of natural materials. Warm shades of wood with their varying structures create a room full of happiness and sincere comfort.

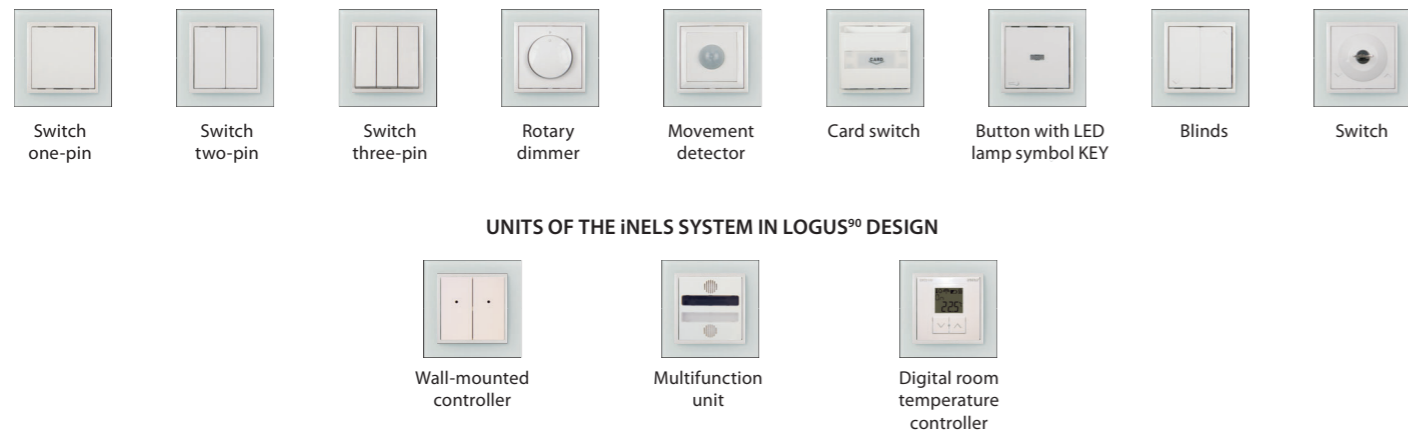

PETRA
The beauty and stability of nature. Stone with its uneven patterns, shaped by time and nature, represent the sense of firm and unending existence.

The entire design series are available from 1 frame up to 4 frames. The BASE and AQUARELLA series are available from 1 frame up to 5 frames. Horizontal or vertical position of the frame is possible thanks to their symmetrical shape.

Device covers in red, orange, green for hospital environments.

DEVICES OVERVIEW

UNITS OF THE iNELS SYSTEM IN LOGUS[®] DESIGN

DEVICES OVERVIEW

- switches
- switches with lock
- time switches
- over-switches
- rotary switches
- dimming switches
- two-pole switch
- pushbuttons
- switch, pulling switch
- orientation lighting
- shutters controllers
- shutters controllers with IR sensor
- digital time switch motion detectors
- card switch
- standard socket
- sockets Schuko, EURO-USA
- RJ45 connectors
- data sockets Cat 5, Cat 6
- sockets radio, TV, satellite, data
- telephone sockets
- double button (2NO+2NC)
- programmable thermostat (space/floor)
- simple thermostat (space/floor) with infrared control automatic relay for controlling blinds
- multimedia sockets

ADVANTAGES MECHANISMS

Mechanism are made of special alloy of non-flammable plastics that prevent in destruction or damage of device body thanks to their strenght and elasticity. The plastic design of the mechanism simultaneously ensures safe insulation from conductive parts of installation. The mounting frame is an integral part of the device. The device is compact, lightweight and enables easy and quick installation without using any tools.

Quick Clips allow installation to adjust the frame on an uneven wall (two positions for the "snap" frame). Inequality walls will allow the deal and floating fingerboard.

Ability to test electrical functionality of your device without disassembly.

Shaped edge of the body mechanism to align the mounting multiple devices.

Depth 20 mm only allows mounting to instrumentation device / box.

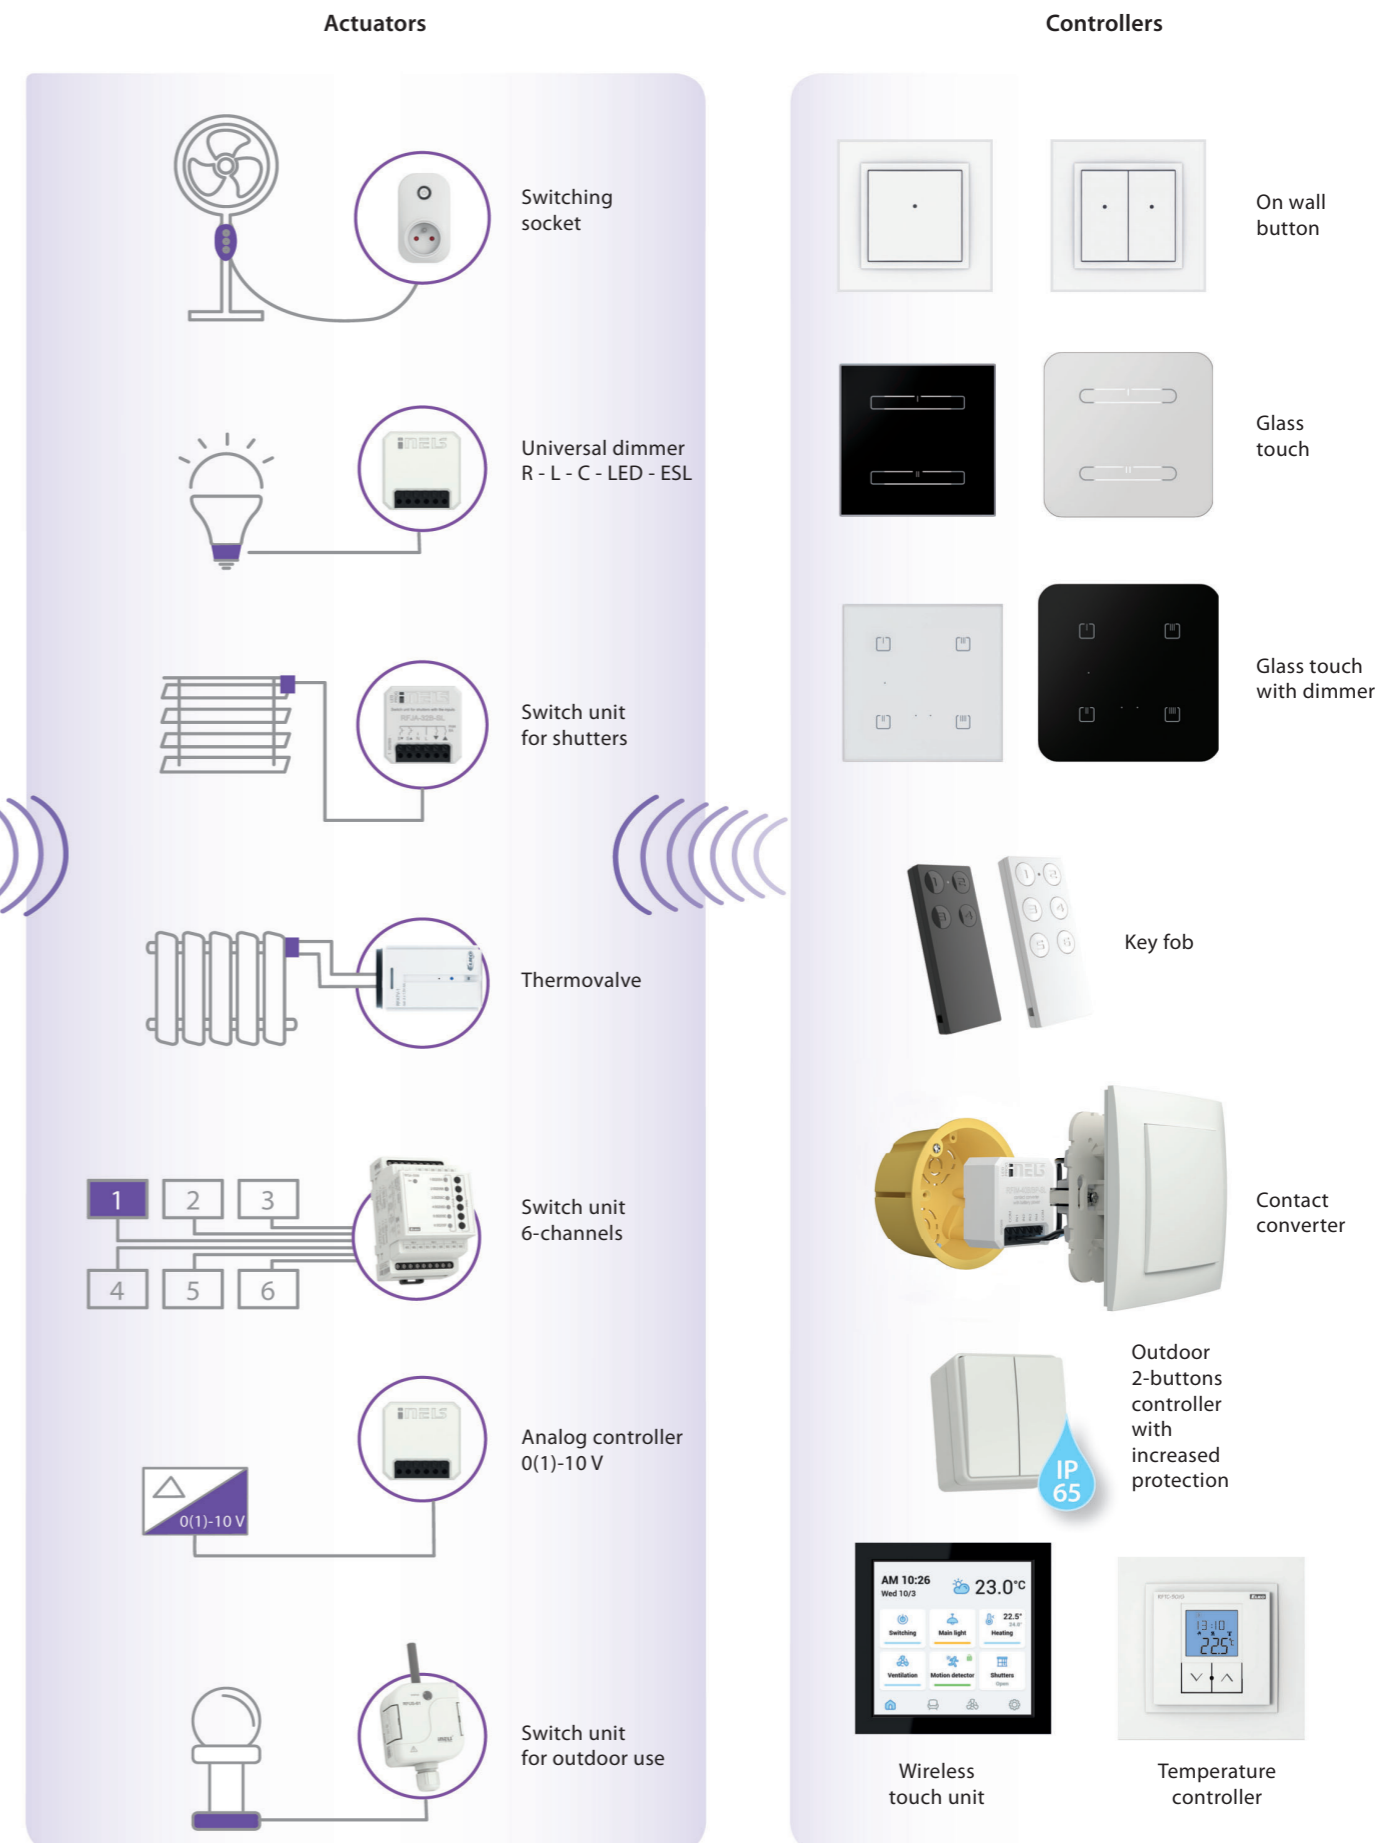

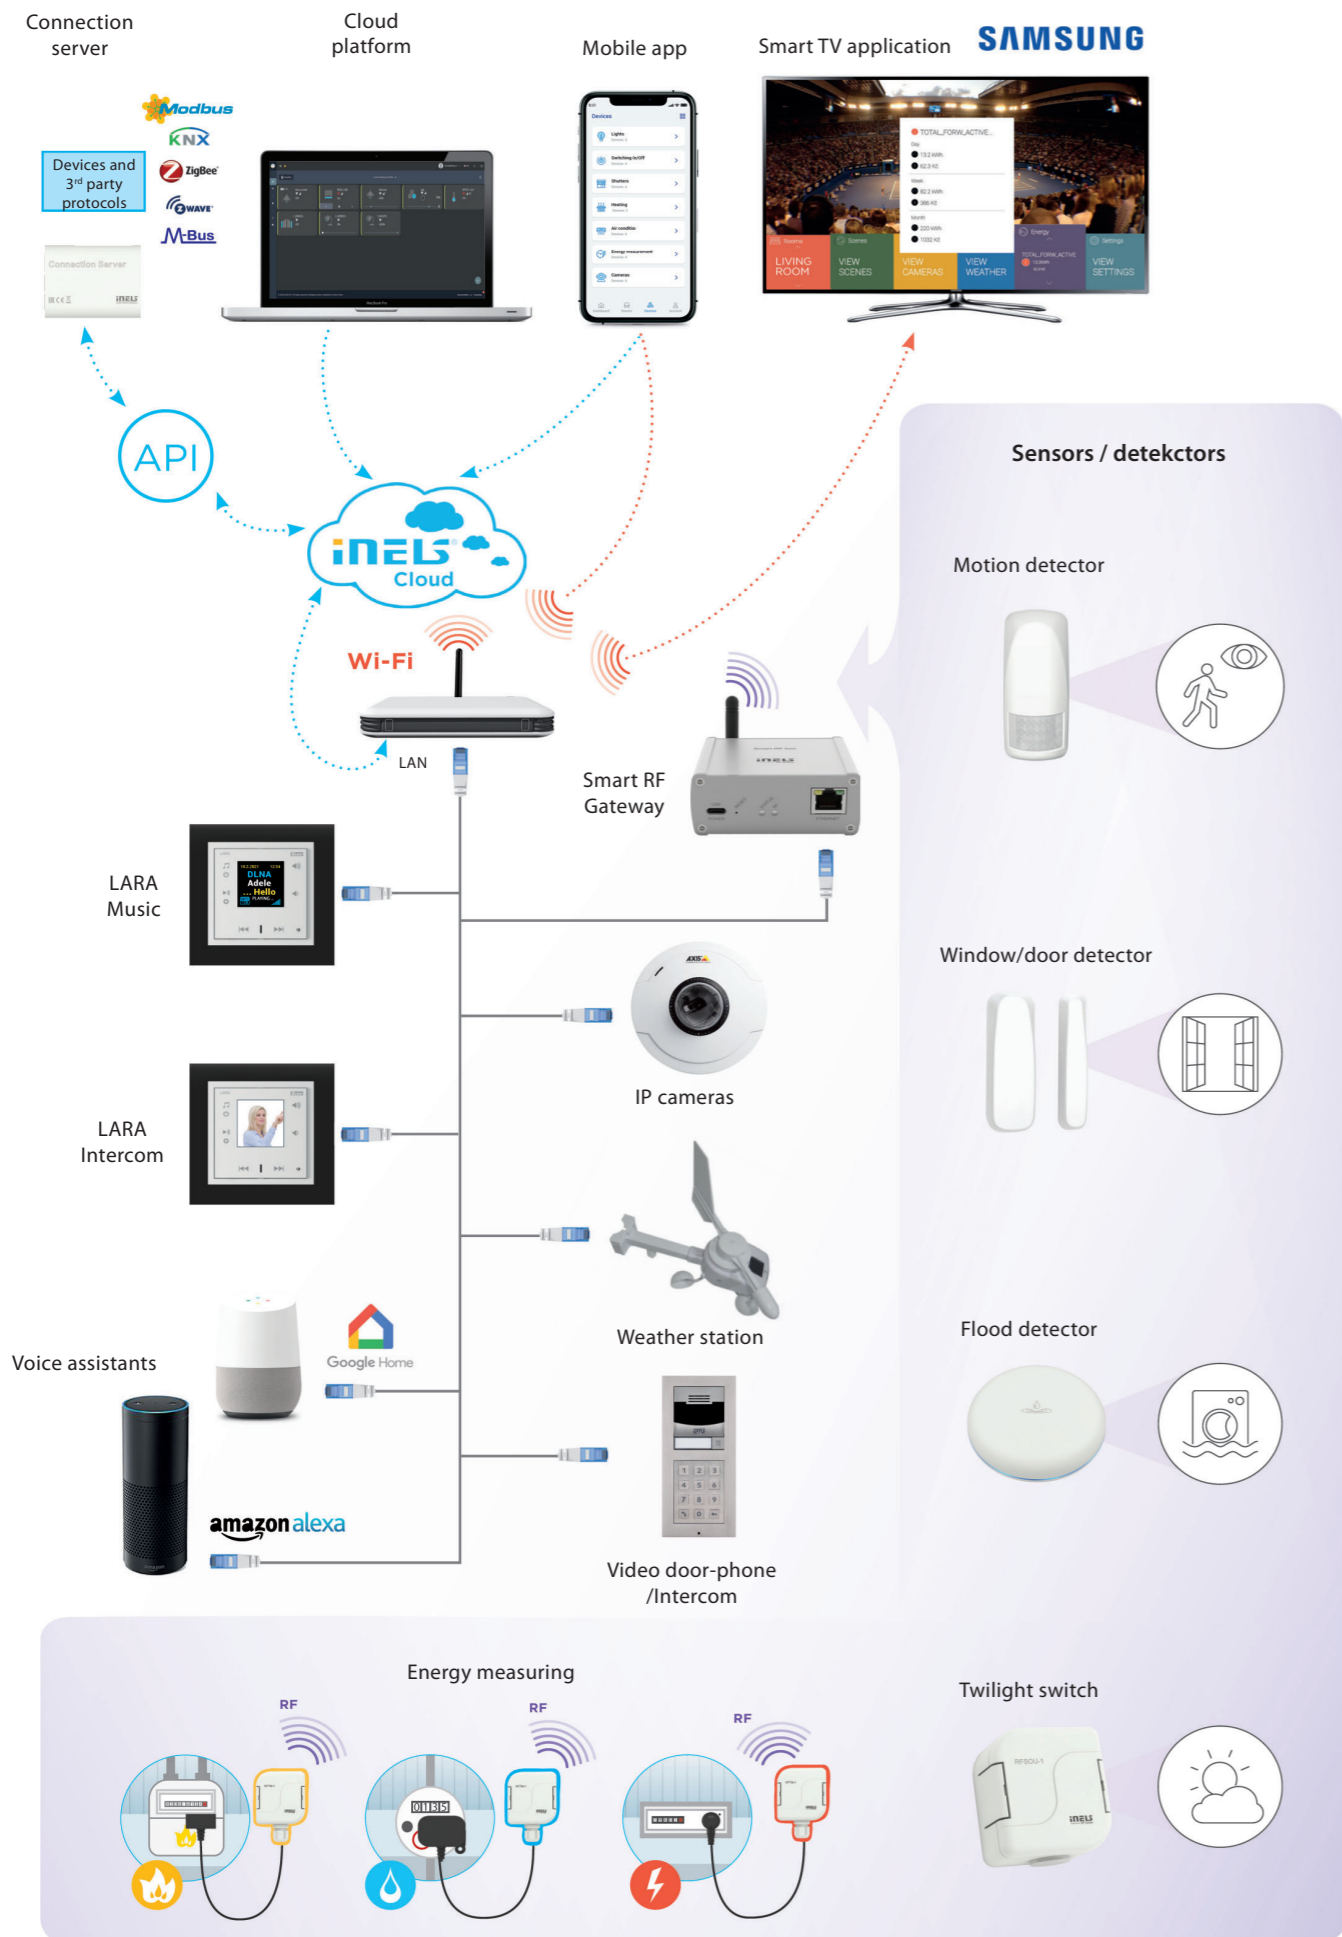

Screwless terminals provide fast and quality connection without need of instrument usage. Double terminals on every pole provide multiple connection without need of extra terminals usage.

Ability to test electrical functionality of your device without disassembly.
